AUTUMN MULTIBREED CATTLE SALE

SATURDAY 28TH OCTOBER 2023

144+ HEAD - TO INCLUDE:

58 PEDIGREE BEEF SHORTHORNS

22 PEDIGREE LINCOLN REDS

13 PEDIGREE LIMOUSINS

50+ COMMERCIAL CATTLE

General Information & Sale Notes

LOCATION: The sale will be held at Melton Mowbray Market, Scalford Road, Melton Mowbray, Leicestershire, LE13 1JY (livestock access via the Nottingham Road, LE13 0NP)

TIMETABLE OF EVENTS

Friday 27th October	Arrival of stock Bull Inspection/Vetting (Please note veterinary cattle inspection is Friday only).	2.00pm onwards 4.30pm-6.00pm
Saturday 28th October	Arrival of stock Show for participating breeds.	6.30am-7.30am 8.00am
	Sale commencing	10.30am

LAA REGULATIONS & NBA WARRANTIES: The Sale will be held subject to the LAA (Livestock Auctioneers Association) Rules, Regulations & Bye Laws of the respective Societies and all animals subject to the Fertility Guarantees as recommended by the NBA. Full copies of NBA Regulations can be obtained from the Auctioneer.

METHOD OF SALE: All pedigree cattle will be sold in Guineas (105 Pence) and strictly in catalogue order unless any alterations are announced by the auctioneers.

ORDER OF SALE: The Show and Sale will commence in the following breed order Beef Shorthorns, Limousins, Lincoln Reds, Simmentals, Commercial Cattle

ONLINE BIDDING: Online bidding is available via Marteye....
Log onto <https://meltonmowbraymarket.marteye.ie/> for further details to register.

****Please register no later than 48 hours prior to the sale****

COMMISSION AND SOCIETY LEVIES: All pedigree cattle will be sold subject to a commission of 5%. Respective Society Levies will be collected on their behalf at the normal rate. Purchaser Transfer Fees will be collected on behalf of Societies where requested. Full Society Terms & Conditions will be available in an "online" catalogue.

VETERINARY INSPECTION: The vet will examine the general health and genetic defects particularly teeth, eyes, testicles, warts and movement. Any animal found with a genetic fault, disease or disorder will be rejected. Weights and scrotal sizes should be within the Society Guidelines. Commercial and unaltered production females will be inspected in their pens by a Society Inspector. All cattle entered for the sale will have their UK Tags examined as an integral part of the pre-sale inspection procedure.

SETTLEMENT AND CLEARANCE OF STOCK - Settlement in full is due immediately at the close of Sale. Agents and customers wishing to purchase on behalf of another party must contact Scott Ruck or the Market Office 48 hours prior to the sale. No animal may leave the Sale Premises without an official 'Pass Slip', obtainable only from the Auctioneer's office upon settlement.

RESERVE PRICES – Vendors shall have the right to refuse to accept the final bid for their animals.

STRAW- Straw will be provided by Melton Mowbray Market.

BIOSECURITY NOTICE:

Please read and observe the following:

Excessive dirty vehicles will not be allowed entry, therefore ensure vehicle is clean before arrival.

All vehicles transporting livestock will be subject to a documentation check before entry to market site.

All visitors and traders must ensure they wear clean clothing and footwear before entering the market site.

All visitors and traders using car park areas please use main entrance.

Hauliers and farmers delivering livestock must disinfect their boots before and after loading or un-loading.

Livestock purchased or unsold will not be allowed to move unless an authorised "pass slip" has been issued by the main office

No livestock will be allowed to remain on the premises after a sale.

Only staff, livestock hauliers, owners or their agents are permitted to load or unload livestock.

Wash hands thoroughly when leaving penna areas.

Please observe our staff's instructions at all times.

SALE DAY CONTACTS:

Dam - DINMORE ZOE NARINA (P) (693802130)

gd. DINMORE ZOE KATRINA (P) (633802208)

Notes:

Dinmore Zoe Selina is from the famous ' Zoe ' Family. She was bought at-foot of her dam at the Dinmore dispersal sale for 8,000gns. Her mother, Zoe Narina is a daughter of the record-breaking Dinmore Katrina who has had an exceptional show career winning championships too numerous to mention. Zoe Narina is maternal sister to the record-breaking Zoe Rosina who we hope to have in our show-team next summer. Zoe Selina is a well-grown, dark roan heifer with a powerful head and correct structure. Very quiet and easy to handle. She is reluctantly offered for sale due to restricted winter housing. Pictures available on Rougemont Pedigree

LIMOUSIN

Vendors' Index

The pedigree, performance, DNA, health information and footnotes included in Society sale catalogues is as supplied by, or on behalf of the vendor. The responsibility for the accuracy of the information therefore rests solely with the vendor and not with the British Limousin Cattle Society Ltd (BLCS). It should be noted that the Estimated Breeding Values for all animals change over time, as new performance records come available. While the BLCS and Genesure Ltd seek to ensure that the information contained in catalogues is accurate at the time of printing in accordance with their terms and conditions, no warranty is given in respect thereof by the BLCS and, to the maximum extent permitted by law, the BLCS shall have no liability for any loss, damage or injury howsoever caused (including that caused by negligence) or suffered directly or indirectly in relation to information and opinions contained in or omitted from this publication. Genesure Ltd's liability is limited to the extent set out in its terms and conditions (a copy is available from the BLCS office upon request).

Scanned	YES

1 Birth Type

'Got by AI' indicates whether the calf was a result of an AI service. If blank, the dam was naturally served. 'Natural calf' indicates the calf was born to its biological dam. 'ET calf' indicates the calf was born as a result of embryo transplant.

2 Myostatin

"Not tested" indicates that no Myostatin test is currently available for the animal. Full details on the Myostatin variants and their effects on performance can be found on the Limousin Society website www.limousin.co.uk, search in 'performance programmes'. In summary:

The Variants:

F94L	Animals with two copies of this gene (ie F94L/F94L) exhibit an increase in muscling (by up to 19%) with no associated increase in calving difficulty, lowered fertility or longevity and by far the majority of animals in the breed carry this gene. Heterozygous animals (those with one copy of the gene) also exhibit these characteristics but not to the same degree.
NT821	Animals with two copies of the gene (ie nt821/nt821) will exhibit characteristics of larger loin depths, reduced fat depths and large, rounded rump and thighs. However, unlike F94L, animals with two copies may also have slightly heavier birth weights bringing with it the potential for more difficult calvings. If animals are 'heterozygous' with F94L (ie F94L/nt821) they will still exhibit quality carcass characteristics but are less likely to be affected by more difficult calvings.
Q204X	Animals with two copies of the gene (ie Q204X/Q204X) will exhibit characteristics of larger loin depth, reduced fat cover and greater meat tenderness. However, they may also have the potential to exhibit larger birth weight and, if females, slightly reduced milking ability. Animals that are 'heterozygous' with F94L (ie F94L/Q204X) will still exhibit quality carcass characteristics but are less likely to be affected by larger birth weights and reduced milking ability.

Two further variants of Myostatin exist in the population but are relatively uncommon in their occurrence. Known as nt419 and E291X, their effects are similar to nt821 and Q204X respectively.

The recognised benefits of Myostatin are:

- ✓ **Increased Meat Yield** – by up to 19%.
- ✓ **More feed efficient**
- ✓ **Higher meat quality** – increased tenderness, reduced fat content, higher polyunsaturated fats

Using Myostatin information

An important factor to remember is that carcass traits (muscling, fat cover etc), calving traits and milk traits in cattle are controlled by MANY genes. Myostatin is only one of them and, as such, it is not an absolute predictor of an animal's performance.

A Myostatin genotype is a further bit of information that may help your decision, but it should be used in conjunction with wider information such as Estimated Breeding Values (EBVs), which bring together information of actual performance from the animal itself, its herdmates and its relatives to predict genetic merit, and your own judgment on type and pedigree.

3 Genetic Colour

Colour and polled/horned genes typically come in pairs called alleles. One is inherited from the sire and one from the dam. Where an animal's alleles are the same, it is said to be 'Homozygous' (Hom.) Where the alleles are different (because there is more than one variant of the gene, the animal is said to be 'Heterozygous' (Het.)

"Hom. Red" – animals will be red and will pass on red genes.

"Hom. Black" – animals will be black and will pass on black genes. All calves will be black, since black colour genes are dominant.

"Het. Black" – animals will be black and will pass on either a red or black gene.

"Het. Red" – animals will be red and will pass on a red gene or a colour gene known as the 'wild type' that is non-colour determinate. (The coat colour of calves inheriting the wild type gene will be governed by the gene they inherit from the other parent. It is rare, but it is also possible for an animal to be homozygous for the wild type gene, in which case they will be reddish/brown to brownish/black).

4 Genetics for Horned/Polled Status

A bull that is "Hom. Polled" - will be polled himself and all calves will be polled (since he only has polled genes to pass on and they are dominant).

A bull that is "Het. Polled" – will be polled himself and will produce some polled and some horned calves (assuming the cows are all horned).

A bull that is "Hom. Horned" – will be horned himself and will pass only horned genes to his calves.

For more information on both Genetic Colour and Polled/Horned, go to www.limousin.co.uk, search in 'performance programmes' or scan the QR code above.

5 Estimated Breeding Values and Genomic Estimated Breeding Values (EBVs & GEBVs)

EBVs & GEBVs are expressed in the same unit as the recorded trait (eg kgs for 400 Day Weight, mm for Muscle Depth etc) are relative to the Breed Average.

- a) In sale catalogues, **Breed Average for each trait is represented by the vertical line that is central on the bar chart...** **a**
- ✓ Bars that lie to the right of that line indicate EBVs/GEBVs that are above average. The further to the right they lie, the higher above Breed Average they are.
 - ✓ Equally, bars that lie to the left of the line indicate EBVs/GEBVs that are below Breed Average. The further to the left they are, the further below Breed Average they are.
- b) Accuracy Values (Acc%) are expressed as a % and indicate the quantity and quality of records used to produce each EBV, GEBV or Index. The closer they are to 100%, the more accurate the EBV. Highly accurate values are less likely to change over time. **b**
- c) The numeric EBV & GEBV values on the charts can be used to further refine comparison with the breed using the Breed Benchmark which is updated annually.

For more information on EBVs and GEBVs, go to www.limousin.co.uk and search under 'Breed Improvement' in the main menu or scan the QR code opposite.

EBV, GEBV and pedigree information on all Limousin cattle are just a few internet clicks away...

Step 1: Go to www.taurusdata.co.uk

Step 2: In the 'All Breeds Quick Search' box type the name or ear number of the animal you are interested in or click on the 'Breeder Search' button to look at all animals belonging to or bred by a particular breeder.

The site will then tell you the animal's owner/breeder details, its breeding values, its pedigree and list its progeny with full links to all of their information.

6 Adjusted Weights

These are the 'raw' weights recorded for the animal throughout its early growing stages. They are adjusted for age, but are not adjusted for any other factor such as management, nutrition, dam age, differences between farms etc.

For further information or if you have any query, please let us know - telephone 02476 696500, e-mail info@limousin.co.uk or speak to Society staff and Council members attending the sale.
