

SKIPTON 2023

SALE OF 54 PEDIGREE BEEF SHORTHORN CATTLE

On WEDNESDAY 8TH NOVEMBER 2023

SALE 10.30am MAIN RING

Prior viewing of the Beef Shorthorn cattle penned on Tuesday is welcome on
Tuesday evening 5.00pm-7.00pm

Craven Cattle Marts Ltd
LIVESTOCK & AGRICULTURAL AUCTIONEERS & VALUERS
Gargrave Road, Skipton, North Yorkshire, BD23 1UD
01756 792375 www.ccmauctions.com

Northern club are organising a Jacob join supper on the pre-sale evening - 7pm onwards. All welcome but please bring food. Contact Janet Dunning 07803633978 to book in.

Directions & Location

Skipton Auction Mart is situated 21 miles from Harrogate and 31 miles from the M6 (J31) at Preston. Is on the **A59 Preston-Harrogate main road**. It is close to the junction of the A59 and A65 (Kirkby Lonsdale-Settle-Skipton-Leeds-Road). Signposted **AUCTION MART** at all major roundabouts and junctions

Accommodation local to the market:

(These are located close to the market, they are not recommendations by the company)

The Woolley Sheep Inn, 38 Sheep Street	01756 797922
Skipton Park Guest 'Otel, Salisbury Street	01756 700640
Low Skibeden Farm House B & B, Harrogate Road	01756 793849

Rendezvous Hotel, Keighley Road	01756 700100
The Coniston Hotel, Coniston Cold	01756 748080
Tarn House Hotel, Stirton	01756 794891
Travel Lodge Hotel, Gargrave Road	0870 0850950
Premier Inn, Gargrave	0871 5278980
Throstle Nest B&B, Cononley	01535 630783

Online live bidding will be available for this sale, please make sure you are fully registered at least 48 hours before the sale, contact the office on 01756 792375 to arrange your credit limit.

**YOU WILL NOT BE ABLE TO BID ONLINE WITHOUT A CREDIT
LIMIT**

PROGRAMME OF EVENTS

ARRIVAL OF STOCK

Tuesday 1.00pm – 4.00pm

Wednesday 6.00am – 8.00am

Please advise office on which day stock will arrive.

PREVIEW

Prior viewing of the cattle penned on Tuesday is welcome on Tuesday evening 5.00pm – 7.00pm. All vendors are requested, where possible, to forward cattle for penning and lotting on Tuesday afternoon.

Facebook live will be held Tuesday afternoon approx. 4.30pm – 5.00pm

Bull Inspection will take place on Tuesday 7th November at 5.00pm

Judging Wednesday 8.00am prompt
Judge: James Rea, Castle Douglas

Classes

1. Best Bull any age
2. Best Heifer born 19.09.2021 to 28.02.22
3. Best Heifer 2022 born 01.03.22 to 31.03.22
4. Best Heifer 2022 born 01.04.22 to 30.04.22
5. Best Heifer 2022 born 01.05.22 onwards

Show classes are subject to change.

Rosettes from 1st to 3rd for all classes
l'Ansons Perpetual Trophy – Female Champion

Sale to commence at 10.30am in the Main ring

Sale Notes

- All cattle in the sale will be accompanied by an official Cattle Society Pedigree Certificate on the day of sale.
- All animals must be in the market and booked in by 8.00am on the day of sale with the CCM staff. (The market is open from 6.00am on Wednesday to accept delivery of cattle, Vendor's who intend to deliver cattle on Tuesday 7th please make prior arrangements with the Market Foreman Andrew Wright on 07831 633774).
- It is the sole responsibility of the vendor to ensure the animal being presented is that described in the catalogue.
- In any dispute the Auctioneers decision is final.

All cattle are sold under the NBA/L.A.A. Conditions of sale and will be sold in guineas.

Facilities

Wash facilities are available on the docks

There are several electric points within the penning area for hair dryers etc.

Please provide you own bedding straw

Please contact Ted Ogden on 07855 958211 further information.

UNDERSTANDING THE BREEDPLAN PERFORMANCE RECORDING INFORMATION IN THIS CATALOGUE

Only Beef Shorthorn GROUP BREEDPLAN EBVs or INTERIM EBVs with Accuracy (Acc) can be validly compared between herds.

ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Accuracy below 75% should be considered low.

CALVING EASE

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

DIR: Direct calving ease indicates how this animal influences the birth of its progeny.

DTRS: Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

BIRTH AND FERTILITY

GL: Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

GROWTH

MILK: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT: Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

CARCASE

CWT: Carcass Weight EBV (kg) estimates the genetic difference in carcass weight at a standard age of 650 days.

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

FAT: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcass. A more positive EBV indicates higher percentage yield for the 300kg carcass size.

IMF%: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Terminal index

The Shorthorn Terminal index is aimed at a commercial herd using Shorthorn bulls over dairy cross cows to breed steers and heifers to turn off at 19 months of age. All progeny are destined for slaughter and no replacement females are selected from within the herd. There is some emphasis on calving ease while finishing steers at around 580 kg live weight (310 kg carcass weight) using a pasture based production system.

Use this index in a commercial herd to produce progeny for slaughter. The index has moderate emphasis on easier calving (ie getting a live calf with minimal human interference) while producing calves that will then grow quickly to market specifications at around 19 months of age. The index is focused on slaughter animals and does not account for maternal traits and is therefore not suited to breeding replacement females.

If you are using smaller framed cows or heifers in your herd, then you should also put extra emphasis on a higher Calving Ease Direct EBV when selecting a sire using this index.

Self Replacing index - The Shorthorn Self Replacing index is aimed at a Shorthorn herd selecting replacement females from within the herd while breeding steers and excess heifers to turn off at 19 months of age. There is emphasis on calving ease and maternal traits while also looking to finish steers for slaughter at around 580 kg live weight (310 kg carcass weight) using a pasture based production system supplemented with extra rations during the finishing phase.

This Self Replacing index is also suitable to using Shorthorn sires over mixed breed cows where replacement females are sourced from within the herd. There may be some hybrid vigour expressed in the progeny depending on the breed type of the cows used. Therefore you should consider placing extra emphasis on the Calving Ease EBVs (more positive) of the sire to allow for possible heavier birth weights of his calves due to hybrid vigour.

Use this index in both commercial and pedigree herds where you are balancing the requirements of selecting replacement females while also producing animals for slaughter.

Maternal Index - The Maternal Index is designed for a commercial Beef Shorthorn cross herd that is focussed on breeding herd replacements and on weaning as many and as heavy calves as possible at 8 months of age. It estimates the genetic differences between animals in net profitability per cow mated, for an example Beef Shorthorn Euro cross commercial cow herd targeting the production of pasture grown calves. Steers and heifers are weaned and marketed at an average of 350kg live weight at 8 months of age for further finishing or as replacement heifers.

The Beef Shorthorn GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Beef Shorthorn Cattle Society nor the ABRI oversee or audit the collection of this data.

September 2023 Beef Shorthorn - Percentile Bands for all 2021 born animals

Use this table as a guide to compare individual animals with the current genetic level of the breed

Beef Shorthorn Cattle Society Sale Regulations

Notes for Sale/Auction Catalogues

Whilst every effort is made to ensure the accuracy of the information contained on the website database and the pedigree certificate, the information is not warranted by the Society as it is based on data supplied by members and/or third parties. Purchasers should check the animal enquiry screen of the Society website for sire or parentage verification. Where this field is blank the animal has not been verified. In the case of females that are neither embryos nor imports and with no parentage queries this field will not be completed and will be left intentionally blank as verification is not required. The Society and its officers shall not have any liability for the accuracy of the information contained within either the website database or the pedigree certificate.

The Beef Shorthorn Cattle Society has previously sanctioned the use of Maine Anjou cattle (a French breed of Shorthorn derivatives) in a controlled breed improvement programme. That successful programme is now complete and has been closed (Oct 1999).

All calves born on or after 1 January 2001 shall be registered in the Coates Herd Book (Beef) with no mention of percentage (pertaining to Maine Anjou influence) provided that both parents are previously registered in Coates Herd book (Beef). Purchasers who are interested in the influence of Maine Anjou in any prospective purchase are invited to inspect the four-generation pedigree certificate or contact the Secretary for further details. Cattle born before 1 January 2001 will continue to display the percentage of pure Shorthorn blood on their certificate.

Other Society rules as follows:

Amended February 2023

- By a ruling of the Directors of the Beef Shorthorn Cattle Society a levy of three per cent of the net sale price (after deduction of auctioneers' commission) will be deducted from the vendors statements before settlement and paid to the Beef shorthorn Cattle Society.
- All Cattle will be sold with an NBA fertility warranty. The cost of this warranty is £6 + vat per male animal and £4 + vat per female animal. This cost will be divided equally between the vendor and the purchaser and collected by the auctioneer at the time of sale. The auctioneer will pay this money directly to the NBA.
- Animals will be inspected in the sale premises, and, by a ruling of the Directors, the inspector(s) is empowered to instruct any exhibitor to withdraw from the show and sale any animal they consider not to be of the required standard. Bulls will be inspected by a vet appointed by the Society. Bulls not attaining the required minimum testicle size or displaying irregular testicular conformation or displaying overshot or undershot jaws will be rejected from the sale.
- There will be a minimum selling price of 2000gns on each bull entered for sale. Bulls not attracting a bid of 2000gns will be passed out of the ring unsold.
- All show animals must be halter led.
- Grading register animals will be sold at the end of the sale.
- The Beef Shorthorn Cattle Society operates a compulsory health testing scheme at all Society sales listed below.
- As of 1 January 2021, any bull carrying a double deletion of any myostatin variant will be ineligible for a Society recognised show class or a Society recognised or supported sale. This rule will also apply to bulls carrying single deletions of two distinct variants.

Health Testing Requirements for Beef Shorthorn Society Sales

Amended February 2023

- 1) All animals entered for Beef Shorthorn Society Sales must come from herds which are members of a registered CHeCS health scheme and must have been testing for BVD and Johne's Disease for a minimum of 12 months.
- 2) All animals must be individually blood tested no more than 3 months prior to the sale for BVD antigen and IBR antibody unless coming from a herd which has accredited status for the relevant disease. Accredited herds do not need individual animal tests for the diseases for which they are accredited.
- 3) All females whether from an accredited herd or not must be vaccinated against BVD to provide cover for the relevant period (ie, the sale date) relating to the type of vaccine. The vaccination date must be submitted to the relevant health scheme provider when the pen card is requested. It is recommended that males should also be vaccinated as above.
- 4) Animals testing antigen positive (PI) for BVD will not be accepted for sale.
- 5) The results of the blood tests must be displayed at the sale on a health pen card supplied by a CHeCS accredited health scheme.
- 6) All animals must have a risk level for Johne's displayed on the pen card and this must be a minimum level 4. Non homebred animals will be identified as such.
- 7) All animals must have an individual pen card with the date of the last TB test and the testing interval (or completed as 'TB exempt' where applicable). The box must not be left blank.
- 8) All bulls born after January 1st 2018 and entered for sale at a Society Sale must have their myostatin status listed in the sale catalogue.
- 9) Calves under 2 weeks old cannot be accepted for sale.
- 10) Calves at foot over 6 months from non BVD Accredited herds need to be tested for BVD antigen. Calves from BVD accredited herds do not need to be tested.
- 11) No other health information will be allowed to be displayed, except for official semen test results.
- 12) **It is the responsibility of the vendor to ensure that the correct tests have been carried out and that the health pen cards are available for the sale.**

Advisory checklist for vendors

- 1) Blood test all animals bound for sale (excluding calves at foot under 6 months old) no more than 3 months prior to the sale and at least 1 month prior to sale.
- 2) Vaccinate all animals bound for the sale against BVD. Ask your vet for advice on when to vaccinate.
- 3) Send the blood samples to one of the CHeCS accredited health schemes (details on website) stating that tests are required for BVD antigen and IBR antibody and **request a health pen card stating clearly that the animals are entered for sale at a Beef Shorthorn Society Sale**. If your vet is sending off the samples on your behalf, ensure they see a copy of this letter and that all the required tests are requested on the sample submission form.
- 4) If herd accredited for BVD and IBR, request pen cards **at least 4 weeks prior to sale** with vaccination information.
- 5) **Make sure you have received the cards before you arrive at the sale and check that all the relevant information is displayed on the card.**

If you have any questions about these requirements, please contact the Society office.

Herd Health Declaration

In order to give prospective purchasers as much information as possible about the health status of cattle for sale, we are also including a Herd Health Declaration. The Herd Health Declaration should be returned to the auctioneers with the entries. This information will be printed in the front of the sale catalogue under the vendor's name.

ANIMALS ARRIVING AT A SALE WITHOUT A COMPLETED HEALTH PEN CARD WILL NOT BE ALLOWED IN THE SALE. IT IS ALSO THE VENDOR'S RESPONSIBILITY TO ENSURE THE CARDS ARE CORRECT.

44 HIGHSKY ERIN'S ELIZABETH (P) (ET)

(693805241) AI Roan

Born:21/09/2022

UK167077-100247

Myostatin: E226X-0 , F94L-0 , NT419-0 , NT821-0

gs. ALTA CEDAR PERFECT STORM (P) (X4145501)

Sire - CARRAROCK CHALKIE IE (IE272437950072)

gd. CARRAROCK RUTHIE (IE272437920037)

gs. CARAMBA HECK (IE182542280137)

Dam - CARAMBA ERIN'S KISS (IE182542280178)

gd. CARAMBA LOVELY ERIN (IE182542210130)

Notes:

Erin's Elizabeth is the first homebred heifer to be offered for sale from the Highsky herd. She is full sister to the RWS '22 breed champion and reserve interbreed champion Erin's Enchantment. Elizabeth is polled & zero myostatin, she oozes femininity and would be a great asset to any herd with the bloodlines to be an ultimate breeding machine.

Draft Heifers from RG & HE Thompson, Grinkle Herd

RG & HE Thompson
45 GRINKLE SONIC DAISY (P)
(683800074) Red **Born:25/01/2021** **UK123380-501134**

gs. CHAPELTON BAROLO (P) (553801769)
Sire - GRINKLE SONIC (P) VG 86(643852711)
gd. BALLARD SAPPHIRE ABY (P) (543801030)

Ran with Restoration of Upsall from 3rd April 23, PD'd 5 months is calf on 22/09, a standout powerful heifer with fantastic stature and length, from the renowned Desiree family.

RG & HE Thompson
51 GRINKLE SONIC TESSA (H)
(683800485) Dark Roan

Born:16/05/2021

UK123380-601156

gs. CHAPELTON BAROLO (P) (553801769)
Sire - GRINKLE SONIC (P) VG 86(643852711)
gd. BALLARD SAPPHIRE ABY (P) (543801030)

gs. GLENISLA EXPLORER 825 (P) (583802326)
Dam - GRINKLE EXPLORER TESSA (P) VG 85(643846245)
gd. GILVEN TESSA HONEYSUCKLE (H) (613801803)

Notes:

Ran with Restoration of Upsall from 3rd April 23, who has easy calving figures and a fantastic temperament, PD'd 5 months in calf of 22/09, a smart dark roan heifer with a great temperament.

QR CODES

In this catalogue we have printed QR code for each animal, this will take you to the web page which will give you full information on pedigree, bar charts and photographs if available

Step 1

Download and install a QR code app on your smartphone if you don't yet have one. Open your App Store, Market, Marketplace or App World application (for the iPhone, Android, Windows Mobile and BlackBerry platforms, respectively).

Step 2

Search for "QR code reader," and then download and install a free app. The app should be named something to the effect of "QR Code Scanner" or "QR Scanner." There are paid versions of these kinds of apps, but the free ones work just as well.

Step 3

Open the QR barcode app on your smartphone, and choose "scan from camera" or "scan QR code" from the main menu. A new window should open with a square in the middle of it.

Step 4

Center the QR code in the middle of the square that's currently displayed by your QR barcode app. The app should automatically take a picture of the QR code for you when it has finished scanning the code. A new pop-up menu will appear, with the QR code information on it.

Step 5

Click the link that was embedded in the QR code, this will direct you to the Society website.
